Claims 1-17

The feature of coexisting with a sulfate of a product from polyalkyleneimine modification and/or a polyalkyleneimine is not disclosed in any of the documents that are cited in the international search report, and is not obvious to a person skilled in the art; therefore, the inventions that are set forth in claims 1-17 are novel and involve an inventive step.

Box No. VI Certain documents cited

1. Certain published documents (Rule 70.10)

Application No. Patent No.	Publication date (day/month/year)	Filing date (day/month/year)	Priority date (valid claim) (day/month/year)
JP 2003-073570 A [EX]	12 March 2003 (12.03.2003)	31 August 2001 (31.08.2001)	
JP 2003-041136 A [EX]	13 February 2003 (13.02.2003)	26 July 2001 (26.07.2001)	

2. Non-written disclosures (Rule 70.9)

Kind of non-written disclosure	Date of non-written disclosure (day/month/year)	Date of written disclosure referring to non-written disclosure (day/month/year)

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The amendments to the claims of the present application set forth a "sulfate of a product from polyalkyleneimine modification and/or a polyalkyleneimine." However, it is not clear whether the disclosure "sulfate of" modifies both the "product from polyalkyleneimine modification" and the "polyalkyleneimine," or if it modifies only the "product from polyalkyleneimine modification;" therefore, the nature of the inventions is unclear.
